## Professional Profile

---

**Full Stack Developer** with **5+ years** building end-to-end web applications, REST APIs and cloud services for fintech, banking, investment and PropTech companies. Solid backend in **Python, NodeJS and C#**, frontend with **React** and JavaScript/TypeScript, SQL/NoSQL databases and deployments on **AWS**. Experienced integrating banking services, authentication and security (OAuth), API gateways (KrakenD) and high-transaction-volume systems — taking features from technical design all the way to production.

## Professional Experience

---

### Konfío — Full Stack / Backend Developer

2024 – Present

*Mexico City*

*Digital banking & financial products*

- Integrated services for digital-banking products with **NodeJS** on **AWS**, exposing and orchestrating REST APIs through a **KrakenD** API gateway.
- Implemented **OAuth** authentication and authorization to secure services and integrations with core banking systems.
- Delivered features end-to-end with product, frontend, QA and DevOps teams in a regulated fintech environment.

### GBM — DevSecOps / Backend Developer (C#)

2022 – 2024

*Mexico City*

*Security automation & high-volume record-keeping*

- Started in **DevSecOps**, automating security processes and integrating solutions to harden pipelines and operations.
- As **Backend Developer**, built a **C#** record-keeping platform handling high transaction volumes, focused on stability, performance and data integrity.

### TuHabi — Full Stack Developer

2021 – 2022

*Mexico City*

*PropTech / home sales*

- Developed **Python** applications and REST APIs for home sales and property valuations (appraisals), connecting business logic with user-facing apps.
- Worked with relational and non-relational databases over large real-estate datasets.

### Codster — Software Developer

2019 – 2021

*Mexico City*

*Consulting / custom software*

- Built applications for third-party clients — mainly **Davivienda** — in **Python** on **AWS**, including credit-scoring logic used to grant loans.
- Covered full development cycles: requirements, data modeling, implementation, testing, delivery and support.

## Technical Skills

---

**Frontend:** React, JavaScript, TypeScript, HTML, CSS, REST API consumption, dashboards & web apps

**Backend:** Python, NodeJS, Django, Flask, FastAPI, NestJS, C#, API design, microservices, scripting & automation

**Cloud & DevOps:** AWS (Lambda, API Gateway, S3, RDS, DynamoDB, Step Functions, CloudFront), KrakenD, OAuth, Docker, CI/CD, Linux, Git

**Databases:** PostgreSQL, MySQL, MongoDB, DynamoDB, advanced SQL, data modeling, query optimization

**Data & ML:** Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, XGBoost

**Personal Project**

---

**QuantCoder — Algorithmic Trading Platform** 2023 – Present

*Own project · quantcoderpro.com*

- Machine-learning crypto-signals platform, 100% serverless on AWS (Python, ML, AWS).

**Education**

---

**B.Eng. in Computer Systems** 2019

*Instituto de Estudios Universitarios (IEU)*

**B.Sc. in Earth Sciences (Space Sciences)** 2018

*Universidad Nacional Autónoma de México (UNAM)*

**Certifications**

---

**Data Science and Machine Learning: Making Data-Driven Decisions** 2024

*MIT Schwarzman College of Computing*

**Analytical Introduction to Data Science (Diploma)** 2025

*UNAM — Faculty of Sciences, Continuing Education*
